FCC Notice

This device complies with part 15 of the FCC rules. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses, and can radiate radio frequency energy and may cause harmful interference to radio communications if not installed and used in accordance with the instructions. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and the receiver.
- Connect the equipment into an outlet that is on a different circuit from the GPS unit.
- Consult the dealer or an experienced radio/TV technician for help.

Used with an optional GPS antenna in cases where clear view of the sky is blocked by metal objects or metalized windshields. (Antenna not provided.)

9 Reset Button
Resets and restarts the device.

About GPS

The Global Positioning System (GPS) is a constellation of satellites that a GPS receiver uses to calculate geographical positions. To determine a position, data from at least three satellites is required. To determine altitude, the data from four or more satellites is required. Accuracy of the positioning varies from 10 feet to several hundred feet, depending on vehicle placement and the surrounding environment.

Geographical terrain (such as mountains), man-made structures (such as highway overpasses, bridges, and tall buildings), as well as weather can interfere with the GPS signal. For best GPS reception, position the TripMaker RVND and mount with a clear line of sight to the sky.

Some vehicles may have a limited view of the sky due to metal sun shields or a metallized windshield coating. If your unit does not appear to receive signals well inside your vehicle but works well outside, contact Rand McNally for an available external antennae.

Map data used by the TripMaker RVND includes the geographical coordinates for address locations and points of interest (POIs). With GPS reception, your device calculates a route to your selected location.

What's Included

Your TripMaker RVND includes:

- TripMaker RVND navigation device
- Mount and cradle
- 12V vehicle charger
- Home charger (100/240V)
- USB cable
- Extra fuse
- Quick Start Guide

Important Safety Information

Navigation Safety

Caution: Use this navigation device at your own risk.

Caution: Use this navigation device only when it is safe to do so.

Caution: Look at the display only when it is safe to do so.

Caution: Traffic regulations always have priority over any instructions from the navigation system.

Caution: Follow navigation system instructions only when local regulations and road traffic allow you do so.

Caution: Make sure that the mount is securely mounted and properly adjusted before each trip.

Note: If you do not understand the spoken instructions, or are unsure of what to do next, refer to the navigation map on your navigation device.

Installation Safety

Caution: Make sure that the mount does not impair the driver's visibility.

Caution: Do not attach the mount within the airbag deployment zone.

Caution: When installing the mount, make sure that it does not pose a risk in the event of an accident.

Caution: Do not run cables directly next to safety-relevant devices and power supplies.

Caution: **A**fter installation, check all safety-relevant equipment in the vehicle.

Caution: Connect the wall charger to a 120V or 240V outlet only**.**

Caution: Connect the vehicle charger to a 12V outlet only.

Device Safety

Caution: Do not use sharp-edged objects on the device touch screen.

Caution: The device is not waterproof and is not protected against water damage.

Caution: Protect the device from extreme temperatures. Operating temperature for the device is between 32 degrees F and 120 degrees F.

Caution: When parking the vehicle for an extended time, to avoid battery drain, hold down the power button for 10 seconds to power off the device.

Caution: Do not open the navigation device casing.

Caution: Do not attempt to replace the battery. For problems with the battery, contact Rand McNally Customer Support.

Caution: Always follow local regulations when disposing of this device.

Note: Make sure that there are no kinks in the cable and that it will not be damaged by any sharp objects.

Note: Use only a moist cloth to clean the navigation device.

Note: Do not pull the cable to unplug the unit.

Battery Power Light

When the device is charging, the power light on the front of the device displays the status of the built-in battery:

Green	Device is plugged in and the battery is fully charged.
Red	Device is plugged in and the battery is charging.

RVND 5510

RVND 7710

Charge the Battery

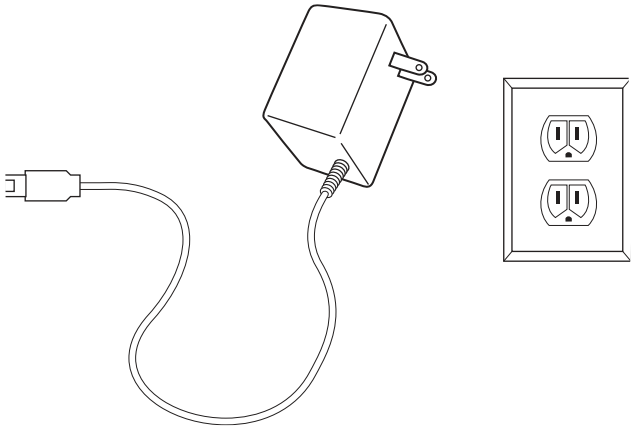
First Time Use

To maximize battery life, plug in the TripMaker RVND for the first two (2) hours of use.

Use the:

- Home charger to power the device from a wall outlet, or
- Vehicle charger to power the device from the battery.

Charge with the Wall Charger



Charge with the Wall Charger

1. Plug the mini-USB socket into the port on the side of the device.
2. Plug the wall charger into a wall socket.

Charge with the Vehicle Charger

Charge with the Vehicle Charger

1. Plug the mini-USB socket into the port on the side of the device
2. Plug the vehicle charger into the vehicle power outlet or cigarette lighter.
3. The vehicle may need to be on for the device to charge.

Install the Cradle and Mount

Select an area with a line of sight to the sky and GPS satellites to ensure reliable GPS information.

Note: Obey all local regulations governing the placement of the mount.

Note: Do not place the mount in an airbag deployment area.

1. Clean and dry the mounting area.
2. Remove the suction cup protective film.
3. Adjust the angle of the mount using the thumbscrew and slide the mount onto the cradle.
4. Pull the suction cup lever up to release suction.
5. Place and hold the mount suction cup against the mounting surface.
6. Press the suction cup lever down until it snaps into place.
7. Angle the bottom of the device into the cradle and align the two slots on the bottom of the device into the two projections on the cradle.
8. Press the top of the device towards the cradle until you hear the upper clip latch into place.
9. Plug the power cord into the device and the vehicle's 12 volt power source.
10. Adjust the navigation device so that it can be easily seen and does not block the driver's line of sight.

Power the Device

Note: To maximize battery life, plug in the TripMaker RVND for the first two (2) hours of use. See "First Time Use" on page 10.

Turn the Device On

- Press and hold the **Power Key** for several seconds, then release. (After 5-10 seconds, the Rand McNally splash window displays as the device powers on.)

Turn the Device Off

- Press and hold the **Power Key** for five (5) seconds, then release. A message displays indicating that the device is powering off.

Reset the Device

When you reset the device, your current route information is lost. Address Book entries, trips, settings, ratings, and messages to Rand McNally are not affected.

- Use the stylus to press the reset button on the side of the device.

Check for Free Updates Window

Warning and Legal Consent Window

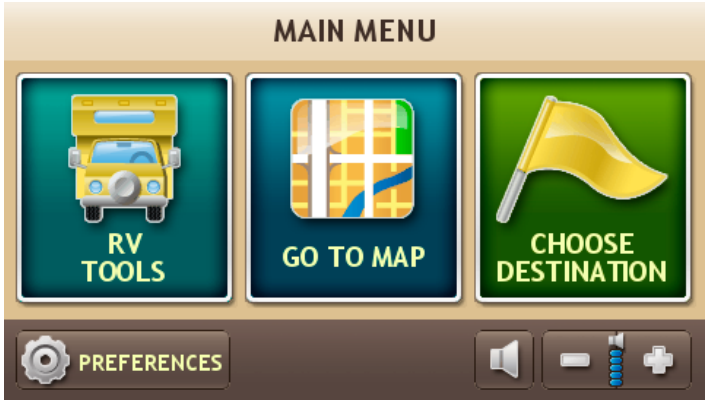
Warning and Legal Consent Window (Mid Route)

Start the TripMaker RVND

1. Press and hold the device **Power Key** for several seconds. (Device powers on in 5 seconds.)
2. Occasionally during start up, reminder windows such as Check for Free Updates, Dock Update Reminder, or Tips will display.
3. Tap **OK**.

   The Warning and Legal Consent Window displays.
4. To view Frequently Asked Questions (FAQs), tips, or a short tutorial on device use, tap **Tutorial & Tips**.
5. Tap **Accept** or if you turned the device off while on a route, tap **Accept and Continue Previous Route.**

   The Main Menu displays.



The Main Menu

1 RV Tools

Select to enter RV information, access other tools (such as the Unit Converter, Calculator), or to set warnings.

2 Go To Map

Tap to view the map.

3 Choose Destination

Tap to select an address, point of interest (POI), to create a multi-stop trip, or access Rand McNally exclusive pre-planned trips. Also used to select an Address Book entry or a previously selected POI from the History List

4 Preferences

Tap to set general, route, or map preferences.

5 Mute/Unmute the Speaker

Tap to mute or unmute spoken instructions.

6 Set Volume Louder or Softer

Tap to increase or decrease spoken instructions volume.

Fields

Tabs

Page Up/Page Down Buttons

Increase/Decrease Buttons

Tapping the Screen

You can tap many areas on the TripMaker RVND screen to select options or view more information.

These include:

Buttons	On many windows tapping a button selects an option or goes to another page. An example would be the current speed button. Tap this button to display the Virtual Dashboard.
Words and Icons	On some windows, words and icons can be tapped to view more information. An example would be the words Kennicott Ln in the upper left hand picture. Continue tapping to view nearest cross street, and current city and county.
Tabs	Some windows have tabs across the top of the window indicating specific categories. For example, Preferences has three tabs, General, Route, and Map. Tap the Route tab to display or change route settings.
Page Up/Page Down	Some tabs have more than one page of options. On these windows, use Page Up ( ) and Page Down ( ) buttons to move between pages.
Increase/Decrease	Some options can be set to specific values. On these windows, tap on increase and decrease buttons to change settings.

Using Keyboards

Software keyboards are used when entering text. See “Select a Keyboard Type” on page 18.

ABC Keyboard

QWERTY Keyboard

Special Keys

ZIPCODE SEARCH — Tap to search for a location by ZIP code.

To save changes and return to previous window.

LIST — Tap to view a list of names matching the typed characters.

HISTORY — Tap to view a list of previously selected locations.

Add a space.

SYM — Display the Symbol keyboard and type a symbol.

Delete last character and move back one space.

Routing Messages

After selecting a route and tapping Begin New Route, one of the following warning messages may display.

Types of warning messages include:

Via State Violation	Your trip takes you thru a state that is in violation.
Intrastate Violation	Your trip starts and stops in the same state and the vehicle is in violation.
Interstate Violation	If your trip starts and/or stops in two different states and the vehicle is in violation of one of these states.

Routing Message Example

Basic Settings

Language Setting

Select a Language

From the Main Menu:

1. Tap **Preferences.**
2. Tap on the **Language option**.
3. Tap and  to view the options.
4. Tap on the **Language** option and select a language.
5. Tap to save changes.

Keyboard Setting

Select a Keyboard Type

For more information, see “Using Keyboards” on page 16.

From the Main Menu:

1. Tap **Preference.**
2. Tap on the **Keyboard option**.
3. Tap and  to view the options.
4. Tap on the **Keyboard** option and select the keyboard type.
5. Tap to save changes.

Decrease Volume

- Tap .

Mute Spoken Instructions

- Tap . Button changes to .

UnMute Spoken Instructions

- Tap . Button changes to .

You may also tap on . while in driving mode to immediately mute the Volume.

Set RV Information

Note: Only available when in RV mode.

The TripMaker RVND uses RV information to calculate a route for your specific type of vehicle. For more, see "RV Information" on page 129.

RV Info Window

From the Main Menu:

1. Tap **RV Tools** > **RV Info**.
2. Tap  and  to view the options.
3. Tap the option to be set.
4. Enter the new information.
5. Tap to save changes.

Set ETA Adjustment

Set adjustments to your ETA based on your preferred driving style, or taking potential weather or traffic into account.

Note: Only available when in RV mode. See "RV Information" on page 129.

RV Info Window

From the Main Menu:

1. Tap **RV Tools > RV Info**.
2. Tap and to view the options.
3. Tap on the **ETA Adjustment** option and select the type of adjustment to be performed.
4. Tap to save changes.

Vehicle Mode Setting

Select RV or Car Mode

Select the type of vehicle. The TripMaker RVND calculates routes based on this type of vehicle. When **Car** is selected, some RV-related features are not available. When set to RV, routing is calculated for the specified vehicle (see "“Set RV Information” on page 20).

From the Main Menu:

1. Tap **Preferences**.
2. Tap on the **Vehicle Type option**.
3. Tap and to view the options.
4. Tap on the **Vehicle Type** option and select **RV** or **Car**.
5. Tap to save changes.

Set Route Type Option

Set to Calculate Shortest Route or Fastest Route

Set the TripMaker RVND to calculate the fastest route to a location.

Note: You can further tune your route by combining this setting with other route preferences such as Tollways, Freeways, etc.

For more routing options, see “Route Preferences” on page 132.

From the Main Menu:

1. Tap **Preferences**.
2. Tap on the **Route** tab.
3. Tap and to view the options.
4. Tap on the **Route** option and select the route type.
5. Tap to save changes.

Voice Setting

Select a Voice for Spoken Instructions

Note: Male voice (Tom) is only available in English.

From the Main Menu:

1. Tap **Preferences**.
2. Tap on the **Voice Name** option.
3. Tap and  to view the options.
4. Tap on the **Voice Name** option and select a voice.
5. Tap to save changes.

Select a Vehicle Icon and Color

From the Main Menu:

1. Tap **Preferences**.
2. Tap on the **Map** tab.
3. Tap and  to view the options.
4. Tap on:
   - **RV Icon** to set the RV icon and color.
   - **Car Icon** to set the car icon and color.
5. Tap and to view all vehicle icon options.

With the selected vehicle icon displayed:

6. Tap and drag the on the color bar to select a color.

The selected icon and color display above the color bar.

7. Tap to save changes.

Vehicle Icon and Color - RV

Vehicle Icon and Color - Car

Set Warnings

For more on warning options, see "Warning Options" on page 136.

From the Main Menu:

1. Tap **RV Tools > Warnings**.
2. Tap and  to view the options.
3. Tap the warning to be set.
4. **Note:** Tap (decrease) and (increase) to specify the number of miles or hours.
5. Tap to save changes.

Note: To turn specific warnings off completely, tap the button until "Off" displays.

To turn off all warnings, select "None" under Warning/Alert Prompts as is shown in the image on the left.

Warnings Window

Tap to select another route display option.

7 Up/Down
Tap to scroll up and down to view the list of maneuvers. Tap on any item in the list to view it on the map.

Route Option Display- Summary Map View

Summary Map View

1. **Back**
   Tap to return to the Route Map Window.

2. **Total Dist**
   Total distance for the entire trip.

3. **Total Time**
   Total time to complete the entire trip.

4. **Vehicle Location**
   Current vehicle location on the route.

Road Info Field

Current Location Information

On the Route Map Window, the Location Information field lets you view information on the road you are currently on. Tap on the button repeatedly to cycle through the information.

Information includes:

- City, county, and state
- Current road name
- Next intersecting street name

View Current Location Information

1. Create a route or load a trip.

On the Route Map Window:

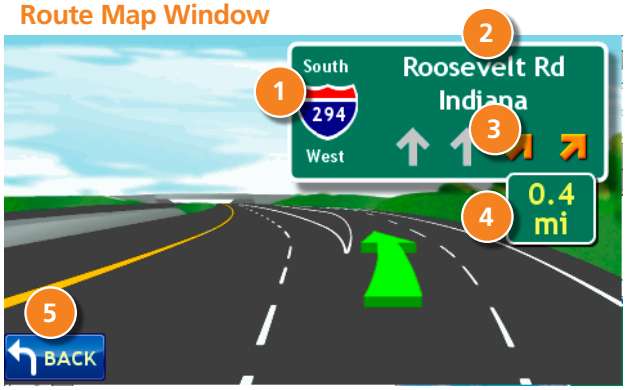
The city, county and state display in the Location Information field.

2. Tap on the Location Information field.
   Current road information displays.

3. Tap on the Location Information field again.
   Next intersecting street name displays.

4. Tap the Location Information field again to redisplay the city, county, and state information.

Route Map Window



Junction View

When on a route, Junction View displays when you have an upcoming maneuver. Once past the maneuver, Junction View closes and the previous window displays.

Once you've driven past the junction, the previous window redisplays.

1 **Next Highway**
Highway you will turn on to.

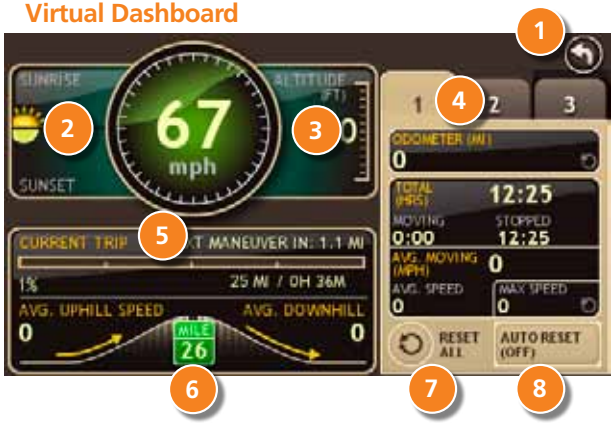
2 **Sign Text**
Sign text to follow to get onto the correct highway.

3 **Lanes**
Number and direction of lanes for the next maneuver. Orange lanes are the ones you should be in.

4 **Distance**
Distance to the upcoming maneuver. Distance decreases as you approach the ramp.

5 **Back**
Tap to return to the Route Map Window.

Virtual Dashboard



Virtual Dashboard

When using the virtual dashboard on a route, the virtual dashboard closes and the Junction View displays an upcoming maneuver. Once past the maneuver, the virtual dashboard redisplays.

1 **Back**
Return to the Route Map Window.

2 **Sunrise/Sunset**
Sunrise/Sunset time based on vehicle location (latitude/longitude) and day.

3 **Elevation**
Current location elevation.

4 **Tab 1, Tab 2, Tab 3**
Gather trip information for up to three trips. Includes odometer settings, hours, and speeds.

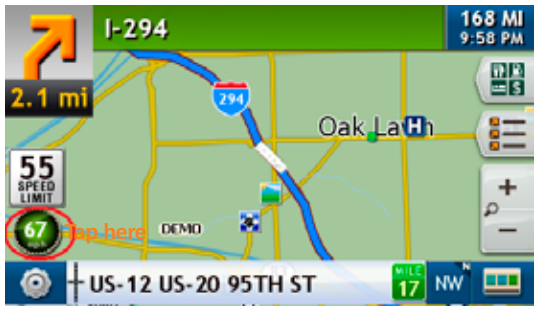
5 **Current Trip**
Percentage of current trip completed, distance to next maneuver, and the number of miles and time spent on the trip to this point.

6 **Average Speeds**
Average uphill and downhill speeds.

7 **Reset All**
Reset trip information for the selected trip (**Tab 1**, **Tab 2** or **Tab 3**).

8 **Auto Reset**
Select to define how much time should elapse before an auto reset of a particular tab occurs. See page 39 for a detailed description.

Virtual Dashboard - Show/Hide



Show/Hide the Virtual Dashboard

On the Route Map Window:

1. To show, tap the **Current Speed** field.
   The Virtual Dashboard displays.
2. To hide, tap the button to return to the Route Map Window.

Virtual Dashboard - Trip information

Gather Trip Information

On the Route Map Window:

1. Tap the **Current Speed** field.

   The Virtual Dashboard displays.
2. Tap on a tab (**Tab 1**, **Tab 2**, or **Tab 3**).
3. If necessary, tap **Reset All** to set the odometer for the selected tab back to zero.

Note: Last reset details the time the open tab was last reset.

Virtual Dashboard - Show/Hide

Virtual Dashboard - Auto Reset Off

Virtual Dashboard - Auto Reset Window

Virtual Dashboard - Auto Reset On

Automatically Reset Trip Information

On the Route Map Window:

1. Tap the **Current Speed** field.
   The Virtual Dashboard displays.
2. Tap on the tab you want to reset automatically.
3. Tap **Auto Reset**.
   The Auto Reset Window displays.
4. To reset trip information after the vehicle has remained stationary after a specific number of hours:
   - Tap ⊕ to increase the number of hours.
   - Tap ⊖ to decrease the number of hours.
5. To save changes, tap **Change**.
   The Virtual Dashboard redisplays.
   The Tab displays the auto reset number of hours.

Detour Window

Detail View Detour Options

Detour Using the Detail View Route Display Option

While navigation a route:

1. Tap to display slide out list.
2. Tap on the maneuver you want to avoid.
3. Tap **Detour**.

   A new route is calculated avoiding (if possible) the selected maneuver.

   The Detail View redisplays, showing the new route.

Highway View Detour Options

Detour Using the Highway View Route Display Option

While navigation a route:

1. Tap to display slide out list.
2. Tap on the highway you want to avoid.
3. Tap **Detour**.
4. On the Detour popup window, tap on the length of highway you want to avoid.
5. Tap **Back**.

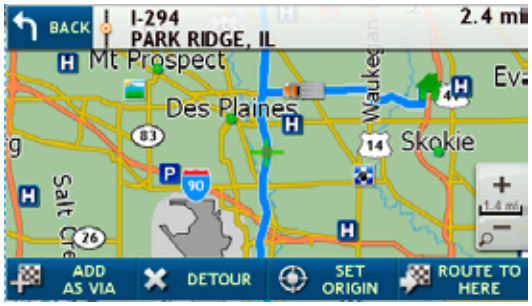
   A new route is calculated avoiding (if possible) the selected length of highway.

   The slide out list redisplays, showing the new route.

Tap on the Map and Detour Around a Route Segment

Route Map Window (with Displayed Route)

Route Map Window (Route Segment to Avoid)



Route Map Window (Detour Around Segment)

Use this procedure to detour around a road segment on your route. Display a Route.

1. Start your route.

On the Route Map Window:

2. Tap on the route segment you want to detour around.
   The crosshairs display on the segment.

3. Tap **Detour**.
   The Route Map Window displays the detour around the selected segment.

Cancel a Route

While navigating a route:

1. Tap .

   The Location Route Options Window displays.

2. Tap **Cancel Route**.

The route is cancelled and the Route Map Window displays your current location.

Route Map Window

Location Route Options Window

Using Predictive Traffic (not available on all units)

Traffic delays based on time of day traveling can be added to a route. These delays are based on expected, historical traffic patterns along the route. To utilize real time traffic, see page 104.

1. Once a route has been calculated, Tap the on the navigation screen to access Predictive Traffic.
2. Tap **Traffic Off**.
3. Customize the route for time of day travel will take place, or Tap "**Now**". The estimated time of arrival will now change every 15 minutes as the route is driven to incorporate expected traffic.
4. Choose **Optional Route**, **Traffic on Route**, or **Traffic List** to view options and details.

Ways to Search for Locations

Find Addresses

To find an address, you can:

- "Search for an Address" on page 52.
- "Search For a City Center" on page 53.
- "Search For an Intersection" on page 54.
- "Search by ZIP Code for an Address" on page 55.
- "Search by ZIP Code for an Intersection" on page 56.
- "Search by Latitude/Longitude" on page 57.

Find Nearby Points of Interest (POIs)

You can find points of interest (POIs) by:

- "Select a Quick Stop POI" on page 61.
- "Near the Current Vehicle Location" on page 69.
- "In a City" on page 70.
- "Along Your Route" on page 71.
- "Near Your Destination" on page 72

Find A Rand McNally POI

- "Select a Rand McNally Editor's Pick" on page 65.

Find a Rand McNally Trip:

You can also find a Rand McNally trip by:

- "Select a Rand McNally Best of the Road© Route" on page 77.
- "Select a Rand McNally Weekend Getaway" on page 78.
- "Select a Rand McNally Scenic Tour" on page 79.
- "Select a Rand McNally Regional Road Trip" on page 80

Location Searches

Destination Selection Window

Destination Selection Window

To access this window from the Main Menu, tap **Choose Destination**.

1 **Back**
Tap to return to the Main Menu.

2 **New Location**
Tap to find an address, city center, or intersection.

3 **History**
Tap to view a list of previous locations.

4 **Address Book**
Tap to view a list of saved locations.

5 **Multi-Stop Trips**
Tap to view a list of saved multi-stop routes or to create a new one.

6 **Points of Interest/ POI**
Tap to search for a point of interest (POI) such as a gas station, restaurant, etc.

7 **Rand McNally Trips**
Tap to select a Rand McNally Best of the Road©, Weekend Getaways, Scenic Tour or Regional Trip.

Destination Search Auto-Complete Feature

Enter the first few characters in a name and a short list displays a couple of names that start with the typed characters.

On the keyboard, the only keys available are for the next valid characters in a search name. If the letters you need do not appear, see "Expand Search for Street Names" on page 49.

Continue entering characters until the searched for name displays in the list. Tap on the name to select it.

Other buttons on this window include:

Tap to search for a location by ZIP code.

Tap to return to the previous window.

Tap to view a list of names matching the typed characters.

Tap to view a list of previously selected locations.

Tap to enter a space.

Tap to view the Symbols keyboard and select a symbol.

Tap to delete the last character and move the cursor back one space.

About City Street Names

Some cities with common names such as "Concord" have several types of names associated with a city.

If a name does not display, continue typing characters until the name you are looking for displays in the list.

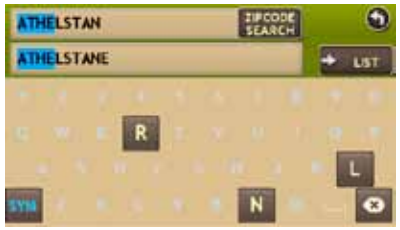
Expand Search for Street Names

The Expand Search button on the street name selection window can help locate addresses that may actually be in a different town, spelled slightly differently, or in a neighboring town.

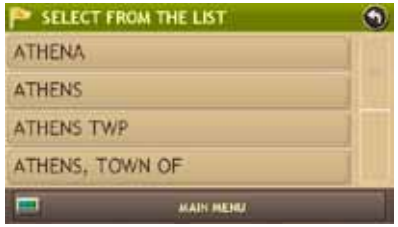
If the next letter in the street name can not be selected on the keyboard, tap **Expand Search** to search a greater area.

First Use

Short City List



Long City List



City/State List

Select a City

First Use

On first use, the Select City Name Window displays. On the keyboard, type the first few characters in the city name.

On the next use, the city name selected in the previous search displays. Tap on the city name to search for a location in the city. To find locations in a different city, type the first few characters in the new city name.

Short City List

As you type the characters in the city name, a short list of matching city names displays. Tap on a city to select it.

Long City List

If the city is not displayed on the short name list, continue typing characters in the city name or tap ENTER to display a long list of city names. Use the up and down arrows to view all cities/states. Tap on a city to select it.

City/State List

The City/State List displays cities of the selected name in different states. Use the up and down arrows to find the correct city/state. Tap on the city/state name to select it.

Special note: If a city name appears twice within a state, you may need to check both for your specific address.

Find Addresses

Location Selection Window

1 **Back**
Tap to return to the Destination Selection Window.

2 **Address**
Tap to search for an address by entering the city, street, and number.

3 **City Center**
Tap to search for a city center.

4 **Intersection**
Tap to search for an address by entering the city and two intersecting roads.

5 **Enter Lat/Long**
Tap to search for a location by latitude and longitude.

6 **Main Menu**
Tap to return to the Main Menu.

Search for an Address

From the Main Menu:

1. Tap **Choose Destination > New Location > Address**.
2. Type the first few characters in the city name.
   The Select From City List displays.
3. Tap on the city/state from the displayed list.
4. Type the first few characters in the street name, or if the next characters of the street name can not be selected on the keyboard, tap **Expand Search** and search a wider area.
   The Select Street List displays.
5. Tap on the street name from the displayed list.
6. Tap the street number or tap **List** to show a list of street numbers.
   The Select From the List **displays valid address ranges**.
7. Tap on the street number range from the list.
   The confirmation window displays.

8. Tap **Begin New Route** to navigate to the location.
   See "Address Confirmation Window" on page 99 for more options.
9. If a warning message displays, select the appropriate response.

Select City List

Select Street List

Enter House Number

Search For a City Center

From the Main Menu:

1. Tap **Choose Destination > New Location > City Center**.
2. Type the first few characters in the city name.
   The Select From the List Window displays.
3. Tap on the city/state name.
   The c**onfirmation window** displays.

4. Tap **Begin New Route** to navigate to the location.
   See "Address Confirmation Window" on page 99 for more options.
5. If a warning message displays, select the appropriate response.

Select From the List

Search For an Intersection

From the Main Menu:

1. Tap **Choose Destination > New Location > Intersection**.
2. Type the first few characters in the city name.
   The Select From the List Window displays.
3. Tap on the city name.
   The Enter Primary Street Window displays.
4. Type the first few characters in the primary street name, or if the next characters of the street name can not be selected on the keyboard, tap Expand Search and search a wider area.
5. Tap on the street name in the list.
   The Select Intersecting Street List shows streets that intersect with the primary street.
6. Type the first few characters in the street name
   The Select Intersecting Street List displays.
7. Tap on the intersecting street name.
   The confirmation window displays.

8. Tap **Begin New Route** to navigate to the location.
   See "Address Confirmation Window" on page 99 for more options.
9. If a warning message displays, select the appropriate response.

Select From The List Window

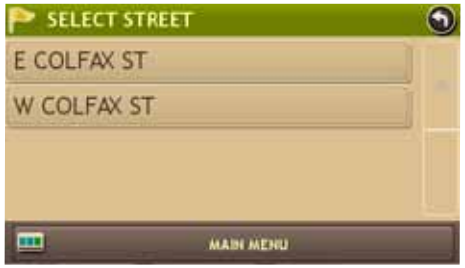
Enter Primary Street Window

Select Intersecting Street List

Enter City Name Window

Enter Zip Code Window

Enter Street Name List



Enter House Number

   The **confirmation window** displays.

9. Tap **Begin New Route** to navigate to the location.
10. If a warning message displays, select the appropriate response.

Enter Zip Code Window

Enter Primary Street Name Window

Select Intersecting Street Window

Search by ZIP Code for an Intersection

From the Main Menu:

1. Tap **Choose Destination > New Location > Address.**
2. Tap **ZipCode Search**.
   The Enter ZIP Code Window **displays.**
3. Type the ZIP code.
   The Enter Primary Street Name Window displays.
4. Type the first few characters in the street name or if the next characters of the street name can not be selected on the keyboard, tap **Expand Search** and search a wider area.
   The Select Primary Street List displays.
5. Tap on the street name from the displayed list.
   The Select Intersecting Street Window **displays**.
6. Type the first few characters in the street name.
   The Select Intersecting Street List displays.
7. Tap on the intersecting street name from the list.
   The **confirmation window** displays.

8. Tap **Begin New Route** to navigate to the location.
   See "Address Confirmation Window" on page 99 for more options.
9. If a warning message displays, select the appropriate response.

Enter Geographic Coordinate Window

Enter Latitude Window

Enter Longitude Window

Search by Latitude/Longitude

From the Main Menu:

1. Tap **Choose Destination > New Location > Enter Lat/Long.**
   The Enter Geographic Coordinate Window displays.

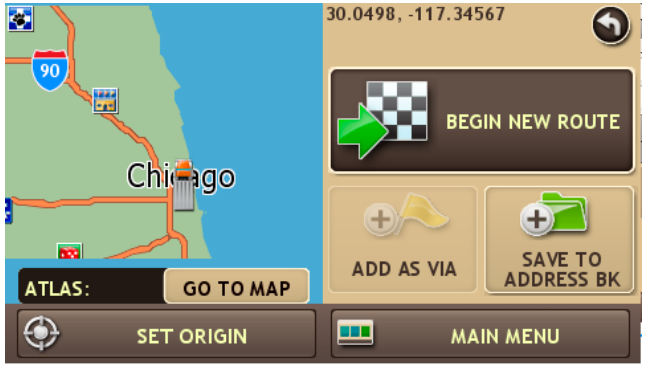
2. Tap in the **Latitude** field.
   The Enter Latitude Window displays.

3. Enter the latitude of the location and tap **Enter**.
   The Enter Geographic Coordinate Window redisplays.

4. Tap in the **Longitude** field.
   The Enter Longitude Window displays.

5. Enter the longitude of the location and tap **Enter**.
   The Enter Geographic Coordinate Window redisplays.

6. Tap **Go**.
   The **confirmation window** displays.



7. Tap **Begin New Route** to navigate to the location.
   See "Address Confirmation Window" on page 99 for more options.

8. If a warning message displays, select the appropriate response.

Point of Interest Windows

POI Selection Window - RV Mode

POI Selection Window - Car Mode

Points of Interest Selection Window

Different buttons display on the POI Selection Window, depending on whether the device is set to **RV** or **Car mode**.

See "Select RV or Car Mode" on page 21 for more information.

1 **Back**
Tap to return to the Destination Selection Window.

2 **My RV/Near Car**
Tap to search for a point of interest near the current vehicle location.

3 **City**
Tap to search for a point of interest in a city.

4 **My Route**
Tap to search for a point of interest along the vehicle route.

5 **Destination**
Tap to find a point of interest near the route destination.

6 **Custom POI**
Tap to access Custom POIs. See page 51 for more detail.

7 **Quick Stops**
Tap to find a RV-friendly POI near the current vehicle location. See "Select a Quick Stop POI" on page 61.

8 **Main Menu**
Tap to return to the Main Menu.

POI Category Window

Points of Interest (POI) Category Window

1. **Back**
   Return to previous window.

2. **RV Campgrounds**
   Tap to search for an RV campground or motor park.

3. **RV Services**
   Find an RV dealer/service or an RV dump.

4. **Parking Rest Areas**
   Tap to search for RV parking or a rest stop.

5. **Travel Centers**
   Tap to select a travel center POI.

6. **Rand McNally Editor's Picks**
   Tap to select a Rand McNally Editor's choice POI.

7. **More**
   Tap to select a consumer (non-RV) related point of interest.

8. **Custom POIs**
   Tap to find third party POIs loaded via the Dock. See page 51.

9. **Quick Stops**
   Tap to find a RV-friendly POI near the current vehicle location. See "Select a Quick Stop POI" on page 61.

10. **Main Menu**
    Tap to return to the Main Menu.

Points of Interest (POIs) Searches

The TripMaker RVND offers thousands of Points of Interest and RV-related POIs.

----------RV-Related POIs----------

RV-Related POIs

See "Select an RV Point of Interest" on page 62.

- **RV Campgrounds**
- **RV Services**
- **Parking Rest Areas**
- **Travel Centers**
  Amenities include: Fueling stations, Food stores, Restaurants, Showers, etc. See "Select and Filter Travel Center Amenities" on page 64.

----------Rand McNally POIs----------

Rand McNally Editor's Pick

You can select an Editor's Pick POI (see page 65).

- **Rand McNally Editor's Picks**

----------Consumer-Related POIs----------

Consumer POIs

You can select a POI by category (see page 67) or by name (see page 68).

- **Other Categories**

Note: Whenever there is a mileage displayed in a point of interest list, the mileage is estimated by way of a straight line (as the crow flies). Once you select and route to the point of interest, the actual mileage from the current location to the point of interest will be displayed.

Select a Quick Stop POI

Select Quick Stop Window

From the Main Menu**:**

1. Tap **Choose Destination > Points of Interest**.
2. Tap **Quick Stops**.
   The Select Quick Stop Window displays.
3. Tap **on a POI type**.
   The Quick Stop List displays.

4. Tap on a location from the list.

Note: Walmart Button provides searchable amenities for parking, pharmacy and open 24 hours.

POI Category Window

Select Subcategory Window

Select an RV Point of Interest

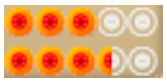
1. Tap **Choose Destination** > **Points of Interest**.
2. Select a search type (**My RV/Near Car**, **City**, **My Route** or **Destination**).

On the POI Category Window:

3. Tap:
   - **RV Campgrounds**
   - **RV Services**, or
   - **Parking Rest Areas**, or
   - **Travel Centers** (See page 64), or
4. If necessary, tap on a subcategory type. (For example, tap State Park.) The Select Point of Interest Window displays POI locations.

5. Icons to the right of a POI indicate whether additional information on the POI is available:

Ratings for the location also display to the right of the POI.



The top row indicates community ratings. The second row indicates your personal ratings of the POI.

Note: For more information see "Rate a RV-Related Point of Interest" on page 83.

6. Tap on location from the list.

   The Map Confirmation window displays.

7. To view photos and videos (if available), click on **Location Info & Media.**

   The Location Information Window displays.

8. Click on:
   - Tap and to read more about the location.
   - **Begin Route** to calculate and start a route.
   - **View Pictures** to view photos of the location (if available).
   - **New Videos** to watch videos of the location (if available).
   - **Main Menu** to return to the Main Menu.

   - **Travel Centers** and filter for amenities. (See page 64.)
   - **Rand McNally Editor's Picks** (see page 65), or
   - **Other Categories** and select a Consumer POI. See page 67 and page 68..

   The Select <Point of Interest Type> Window displays POI locations.

   Note: If no locations are found, a message displays.

4. If necessary, select a subcategory.

5. Tap on a location on the list.
   The **confirmation window** displays:

6. Tap **Begin New Route** to navigate to the location.
   See "Address Confirmation Window" on page 99 for more options.

7. If a warning message displays, select the appropriate response.

Rand McNally Dock Home Page

Custom POI Imports

TripMaker allows for importing of a list of locations that are of interest. Custom points of interest can be downloaded to a file on a personal computer, and transported into the TripMaker device via the Dock.

1. Install the most recent Rand McNally software for the Dock and for your unit.

   Note: Specific icons and colors may vary depending on your unit.

2. Use the Rand McNally Dock to transfer the point of interest file to your device. Plug your device into your computer via USB and wait for the Rand McNally Dock to start.

3. Select the **Custom POI** button.

4. From the Dock, select the file you wish to transfer, select whether it is an "Alert" or "Interesting Location" POI, and then choose the **Transfer** button.

   Note: "Alert" POIs are things like Red Light Cameras, which you would only like to be told about if they are on your route or on the road ahead. "Interesting Locations" are those things you would like a proximity alert about that could be anywhere around you.

5. Step 5 –Load the custom POI's into your device.

   - Unplug your device from your computer
   - Plug it into power using the 12 or 120V power adapter.
   - Turn the unit on. Note that depending on the size, this 1-time load could take more than ten minutes. The maximum number that should be loaded at any one time for best performance should be less than 25,000. When transferring an update of a current list, for instance Red Light Cameras, the new file will completely replace the file that is currently on the device.
   - While transfer is in progress, you will see the Loading Custom POI window.

Loading Custom POI Screen

Note: "Failed records" are those for which some information was dropped from the record, or the locations were invalid.

When transfer is complete, the Load Complete: CUSTOM POI DATABASE window will display.

Load Complete Screen

My Custom POI Settings

Tell Rand McNally About Window

Enter Message Window

Send a Message to Rand McNally

You can send a message to Rand McNally about updates such as road construction, updates to RV road information, etc.

To use this feature, you must install the Rand McNally Dock application on your computer. See "Rand McNally Dock" on page 137.

Send a Message About Your Current Location

From the Main Menu:

1. Tap **RV Tools > Tell Rand**.
   The Tell Rand McNally About Window displays.
2. On the left side of the window, tap **Current Location**.
   Your current location appears below the buttons.
3. On the right side of the window, tap the type of message you want to send. The Enter Message Window displays.
4. Type your message.
5. Tap **Enter** to save the message.
6. To discard the message and return to the previous window, tap .
   The Tell Rand McNally About Window redisplays.

Enter Message Window

To Send a Message About Speed Limit Difference While in Navigation Mode:

1. Tap on the Speed Limit Icon

2. A pop up screen will allow you to notify Rand McNally of a change in speed limit.
3. Make any changes. If the speed limit you are currently traveling is accurate, send to Tell Rand.
4. Tap **Enter** to save the message.
5. To discard the message and return to the previous window, tap . The Tell Rand McNally About window redisplays.

Note: You only need to enter a few brief words. You will be able to modify the message later in Rand McNally Dock using your computer keyboard, before it is sent to Rand McNally.

Your message can be sent to Rand McNally the next time you connect your TripMaker RVND to your computer and use Rand McNally Dock.

Tell Rand McNally About Window

Select Address Window

Enter Message Window

Send a Message About a Different Location

From the Main Menu:

1. Tap **RV Tools > Tell Rand**.
   The Tell Rand McNally About Window displays.
2. On the left side of the window, tap **Enter Different Location**.
   The Select Address Window displays.
3. Search for and select the location.
   The selected location appears below the buttons on the Tell Rand McNally About Window.
4. On the right side of the window, tap the type of message you want to send. The Enter Message Window displays.
5. Type your message.
6. Tap **Enter** to save the message.

   To discard the message and return to the previous window, tap .
   The Tell Rand McNally About Window redisplays.

   Note: You only need to enter a few brief words here, since you will be able to modify the message later in Rand McNally Dock, using your computer keyboard, before it is sent to Rand McNally.

   Your message can be sent to Rand McNally the next time you connect your TripMaker RVND to your computer and use Rand McNally Dock.

Send a Message About a Location on the Map

From the Main Menu:

1. Tap **RV Tools > Tell Rand**.
   The Tell Rand McNally About Window displays.

2. On the left side of the window, tap **Find Location on Map**.
   The Map Window displays.

3. Touch the map and drag the crosshairs over the location.

4. Tap **Back**.
   The selected address location appears below the buttons on the Tell Rand McNally About Window.

5. On the right side of the window, tap the type of message you want to send.

   The Enter Message Window displays.

6. Type your message.

7. When finished, tap **Enter** to save the message.
   To discard the message and return to the previous window, tap .
   The Tell Rand McNally About Window redisplays.

   Your message can be sent to Rand McNally the next time you connect your TripMaker RVND to your computer and use Rand McNally Dock.

Calculator

Use the Calculator

From the Main Menu:

1. Tap **RV Tools > Calculator**.
2. Tap keyboard as you would on any other calculator.
3. When finished, tap to return to the RV Tools Window.

RV Info Window

RV Information

Note: Only available in RV mode. See "Select RV or Car Mode" on page 21.

To ensure the most accurate routing for your size vehicle, enter RV Type as well as the total RV length, width, height and propane onboard.

To change these settings, from the Main Menu:

- Tap **RV Tools > RV Info**.

RV Type — Specify the type of RV. Options are: Class A, Class A w/Tag Axle, Class B, Class C, Class C (Super), Fifth Wheel, Hybrid Trailer, Popup Trailer, Toy Hauler, Travel Trailer, and Truck Camper.

Propane — Use and or to specify the number and size of bottles of propane.

Number of Trailers — Specify the type of trailer. Options are: **0, 1, and 2**.

Total RV Length — Use and or to specify the total length of the RV.

Important Note: Total RV Length should include your vehicle plus trailer(s) and/or toad.

Weight — Use and or to specify the RV weight.

Height — Use and or to specify the RV height.

ETA Adjustment — Specify how arrival time should be estimated. Options are: ETA OK (no adjustment), Increase ETA Some, Increase ETA More, Decrease Some Time, and Decrease More Time.

General Preferences (RV or Car)

To change these settings, from the Main Menu:

- Tap **Preferences** > **General** tab.

General Preferences Window

Vehicle Type Select the vehicle mode. Options are: **RV** or **Car**. This option controls how routes are calculated. When the Car mode is selected, some RV-related features are not available. See "Select RV or Car Mode" on page 21.

Day and Night Map Color

Allows you to automatically or immediately change to day or night coloration for easier route viewing.

Brightness Set the brightness level for screen display.

My Custom POI Setting

This allows you to set warning distance and type, icon image, and display zoom level for any custom locations that you have imported (see page 73 for further information on Custom POI).

Screen Click This allows you to turn off or on the click heard when you tap a button.

Tutorial & Tips View a brief tutorial on how to use the RVND as well as new features, Frequently Asked Questions (FAQs), and Tips to successfully use your device.

Keyboard Select the type of keyboard to be used. Options are: **ABC** or **Computer (QWERTY)**.

Voice Name Select the voice to be used to issue spoken instructions.

Language Select the language to be used to display on the device and issue spoken instructions.

Units Select how vehicle weight is displayed. Options are **U.S. Standard** or **Metric**.

Clock Setting Select whether a 12 hour clock (with am and pm) or a 24 hour clock is set on the device.

Align Screen Calibrate the touch screen.
Note: Select this option if your RVND seems to have buttons that are hard to tap. You may need to realign the screen after a software update using Rand McNally Dock.

GPS Data View information on the current GPS fix.

About View device information.

Traffic Receive Status
Note: Real-Time traffic requires the purchase of an additional accessory.
View information related to the real-time traffic receiver.

Real Time Traffic Settings
Note: Real-Time traffic requires the purchase of an additional accessory.
Set to show real time traffic events related to flow only, incidents only, or both flow and incidents. Real time traffic can also be turned off.

Route Preferences

Note: When a roadway (tollways, ferries, or freeways) or maneuver type (U-turns) is set to Avoid, a returned route may still include them. They're included if the only legal route found contains these types of roads or the route is over several hundred miles.

To change these settings, from the MAIN MENU:

- Tap **Preferences >Route** tab.

Route Preferences Window

Route Preferences Window (page 2)

Recalculation	Select whether reroute calculations will be performed manually or automatically.
Route	Select the type of route. Options are: **Fastest Route** (shortest travel time) or **Shortest Route** (shortest travel distance).
Tollways	Select whether highways are considered in a calculated route. Options are: **Allow Tollways** or **Avoid Tollways**. See note above.
Freeways	Select which types of roads are considered in a calculated route. Options are Allow All, Allow Freeways, Avoid Freeways, and Avoid Small Roads.
U Turns	Select whether u-turns are considered in a calculated route. Options are: **Allow U-Turns** or **Avoid U-Turns**. See note above.
Ferries	Select whether ferries are considered in a calculated route. Options are: **Allow Ferries** or **Avoid Ferries**. See note above.

Route Preferences Window (page 2)

Route Preferences Window (page 3)

Cross Country Borders

Select whether roads crossing a country border are considered in a calculated route. Options are: **Allow Crossing Country Borders** or **Avoid Crossing Country Borders**. When set to Avoid, a route may still cross country borders if the only legal route contains roads that cross borders or if the route origin and destination are in different countries.

Dirt Roads Select whether dirt roads are considered in a calculated route. Options are: **Allow Dirt Roads** or **Avoid Dirt Roads**. See note above.

Tunnels Select whether tunnels are considered in a calculated route. Options are: **Allow Tunnels** or **Avoid Tunnels**. See note above.

Avoid List This allows you to view and/or re-open road segments which you have “permanently” avoided.

Map Preferences

Map Preferences Window

To change these settings, from the MAIN MENU:

- Tap **Preferences > Map** tab.

Map Auto Zoom Select how zoom out displays on the map. Options are: Off (no zoom) , On, Auto Scale (always zoom to keep the current vehicle position and the next turn in the map view), On, Street Scale (maximum zoom out to the local street level between turns), On, City Scale (maximum zoom out to the city level between turns, or On, County Scale (maximum zoom out to the county level between turns).
Note: Map redraw speed is impacted by autozoom choice, especially when combined with 3D map display option.

POI Icons Specify whether consumer point of interest icons display on the map. Options are: **POI Icons On** or **POI Icons Off**. These are general interest POIs that display when the POI category More is selected and when you are zoomed in close enough to see them.
Note: Depending on the map display choice and zoom level, this can impact performance. In 3D display, POI display results in the slowest map redraw performance.
Note: City names can appear on the map when zoomed out by turning on POI Icons.

RV POI Icons Specify whether RV-related point of interest icons display on the map. Options are: **POI Icons On** or **POI Icons Off**. As these POIs may be farther apart, they display when zoomed farther out.

Map Preferences Window

Car Icon When vehicle mode is set to Car, select the type of car icon and color to be used on the device. With some icons, you can select from an infinite range of colors.

RV Icon When vehicle mode is set to RV, select the type of RV icon and color to be used on the device. With some icons, you can select from an infinite range of colors.

Route Color Allows you to select the color of the route line.

Auto Dismiss Warnings Window

Warning Options

To change these settings, from the MAIN MENU:

- Tap **RV Tools > Warnings**.

Note: Only available in RV mode. See "Select RV or Car Mode" on page 21.

Warning/Alert Prompts

Specify how warnings and alerts will prompt you. Options are None (no prompt), Audio & Visual, Visual, or Audio.

Auto Dismiss Warnings

Specify when a warning or alert will automatically be dismissed. Options are: Never, After 10 seconds or After 30 seconds.

Hills & Sharp Curves

Specify when (in miles or kilometers) to issue a warning before reaching a hill or sharp curve.

Speed Limit Alert Specify when (in MPH) to issue a warning when exceeding the speed limit.

State Border Alert Specify when (in miles or kilometers) to issue a warning about an upcoming state border.

Crossing State Border/Time Zone Change Warning

Specify whether a warning is issued when crossing a state border to changing time zones.

Toll Booth Alert Specify when (in miles or kilometers) to issue a warning about an upcoming tollbooth.

Construction Area Specify when (in miles or kilometers) to issue a warning about upcoming road construction.

Speed Limit Change

Specify when (in miles or kilometers) to issue a warning about a speed limit decrease.

Download and Install

Note: An internet connection is required for this feature..

1. Go to http://www.randmcnally.com/dock/ and download Rand McNally Dock.
2. Turn on you TripMaker and connect the RVND to your computer using the USB cable.

On the computer:

3. Click **Install Rand McNally Dock**

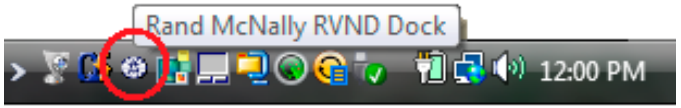
   The Welcome to Rand McNally Setup Wizard displays.

4. Click **Next**.
   The License Agreement Window displays.

5. Click on:
   I Agree button and tap **Next to continue installation**.
   I Do Not Agree and tap **Next** to end the installation.

6. Follow onscreen instructions to complete the installation.
   When finished, the Installation Complete Window displays.

   The Rand McNally Dock icon displays in the system tray in the lower right corner of your screen.



Rand McNally Dock Main Window

1. **Update**
   Click to update your TripMaker RVND software.

2. **Custom POI**
   Import custom destinations or points of interest from a third party provider.

3. **Tell Rand McNally**
   Click to send a message to Rand McNally.
   An exclamation mark indicates messages are ready to be sent. You can click this button to review and edit messages to Rand McNally.

4. **Tools**
   Update Dock preferences, such as language.

5. **TripMaker RVND Manual**
   Click to view the TripMaker RVND User's Guide.

6. **RVND Support Website**
   Click to view the RVND support website.

7. **Go to Rand McNally Website**
   Click to view the Consumer website.

8. **Announcements**
   Find out what is new from Rand McNally, retrieve important support notices

Go to Rand McNally Website

Note: Connection to the internet is required to access the website.

On the RAND MCNALLY DOCK MAIN WINDOW:

- Click on the **Go to the Rand McNally Website** link.

  The Rand McNally Consumer Home Page displays.

Updates

Note: An internet connection is required for this feature.

An exclamation mark next to the **Update TripMaker RVND** button indicates that updates for RVND software are available. There will also be periodic updates to Rand McNally Dock.

You can retrieve software updates without being connected to the RVND. After retrieving updates, you can later load them onto the RVND without needing to re-connect to the internet.

On the Rand McNally Dock Main Window:

1. Roll your mouse pointer over the **Update** button and click **Get Updates**.

   The Updating RVND Window displays and RVND Dock checks for software updates.

2. If RVND software updates are found, click **OK**.

   The RVND Updates Progress Bar displays as the updates are transferred to your device.

   If Rand McNally Dock updates are found, a message displays.

3. Click **Yes** to update the software.
4. Follow on-screen instructions to complete the upgrade.
5. When finished, click **Close**.

   The Rand McNally Dock Main Window redisplays.

View RVND Version Information

These logs are part of Rand McNally's continuous improvement program and only contain information that can be used to diagnose software problems during device operation. No location, tracking or personal information is included.

The information about your specific device is shown here. This information will be necessary when contacting customer support.

View Manual

Note: Adobe Acrobat Reader is required to view the TripMaker RVND User's Guide.

Note: You must be connected to the internet for the first use only. After that, you can view the manual at anytime without an internet connection.

Note: Some Rand McNally Dock features require an internet connection.

On the Rand McNally Dock Main Window:

- Click on the **Read TripMaker RVND Manual** button.

  The User's Guide displays in an Adobe Acrobat Reader Window.

Tell Rand McNally

On the Rand McNally Dock Main Window:

1. Click on the **Tell Rand McNally** button.

   The Tell Rand Window displays. Comments you have previously entered on your RVND are listed.

2. To add a comment, click **Add Comment** and enter information in the provided fields.

3. To delete a comment, click on the comment and click **Delete Comment**.

   Note: To receive a personal response from Rand McNally, include your e-mail address somewhere in the message text.

4. When finished, click Done.

   The Send Comments Window displays.

5. Click:

   - Yes to send comments now.
   - No to send comments later.

Go to RVND Support Website

On the RAND MCNALLY DOCK MAIN WINDOW:

- Click on the **RVND Support Website** button.

  The RVND Support Website displays.
